SCS

IOCC
INTEGRATED OPERATIONS COMMAND CENTRE
Real-time City-Wide Operational Awareness
For Smarter and Safer Cities

HIGHLIGHTS

3 tiered stack open platform for sensors, applications and data integration.

Analytical dashboards for real-time situational awareness

Monitoring critical parameters

Readily Built-in Modules

API Engine for third-party enterprise systems integration

A complete City Operations Management platform that monitors and operates the city business operations and services. It supports the standard operational planning cycle: from incident reporting, responding and tracking of all actions to closing the loop of the incident.

KEY FEATURES

Situational Awareness
- Map Based Situational Awareness of Assets, Events and Resources
- Map Tools including features such as route, location and tracking
- Search functions

Alarms & Notification
- Alerts from IoT devices such as CCTV Camera & Analytics, Body Worn Cameras, UAV, Environmental sensors.
- Alerts are displayed on the map and automatically routed to respective responders.

Real-time Operations Monitoring
- View real-time operations
- Dispatches resources and assets based on analysis
- Reporting via Mobile apps
- Customizable based on client's standard operating procedures.

Reporting & Analysis
- Summary of operations
- Interactive dashboards with drill downs
- Provides actionable intelligence.

Complaints Management
- Complete reporting, dispatching up to closure
- Integrated to CCTV and other sensors
- Mobile apps

Guarded Community
- Useful for police, guarded communities, enforcements.
- Reports plotted on map based on time & location

Patrol, Dispatch & Reporting
- Integrated Platform for guarded communities Reports from PBT can be integrated
- Show types of community related crimes at a specific area
- Dispatch patrol to a location via mobile phone

Emergency & Rescue
- Readiness of rescue and emergency units
- Display location of incident
- Efficient way of reporting through mobile devices

Video Surveillance
- Integrated Platform for alarms & notifications
- Able to integrate to FR, ANPR, Body Cam, Drones/UAV

Computer Aided Dispatch
- Call Handling
- Event Dispatching
- Event Statistics
- Event Monitoring
- Event Map

SIGHT Aware360

SIGHT Aware360 core modules include; Computer Aided Dispatch, Complaints Management, Patrol, Dispatch & Reporting, Guarded Community, Emergency & Rescue and Analytics-powered Video Surveillance. Our most coveted module is the Pothole Management Complaints module that consumes Waze pothole reports and closes the loop in all of Selangor's state local councils.

SIGHT Aware360's core expertise is based on 27+ years in Command & Control for the military & high-availability communication applications that have been used in more than 150 military bases nationwide.

SIGHT Aware360 has a ready API to ingest data from real-time inputs 24/7 from an unlimited array of sources in any format to provide a holistic high-level view.
